Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/556,913	Applicant(s) DUAN ET AL.	
	Examiner JOY K. CONTEE	Art Unit 2617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-4,8-11 have been considered but are moot in view of the new ground(s) of rejection.

Claim Objections

2. Claim 1 is objected to because of the following informalities: In line 9 of claim 1, Examiner believes there is a typographical error wherein "initialing" should read "initializing". Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-4,8-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Evensen et al. (Evensen), US 2003/0153332.

Regarding claim 1, Evensen discloses a handling method after updating of privacy profile of a target UE, wherein, when the location service (LCS) system is aware that the privacy profile of the target UE was updated, the method comprising the steps of: A. For a location request against that UE, the LCS system performing a privacy check, if the

Art Unit: 2617

said location request passes the privacy check (reads on codeword matching), going to step B, otherwise going to step C; B. The LCS system continuing to handle the location request until the end of the handling process of the said location request (reads on accepting location request); C. The LCS system initializing a cancellation procedure to the said location request (reads on not accepting location request) (see page 2 [0016-0017]).

Regarding claim 2, Evensen discloses A method according to claim 1, wherein, before the said step A, the method further comprising: the LCS system deciding whether there is a location request for the said target UE currently in activated state, if yes, going to step A; otherwise ending the current process(see Fig. 3A).

Regarding claim 3, Evensen discloses A method according to claim 1, wherein, when there are more than one location request for the said target UE in activated state, step A is repeated until privacy check for all the location requests for the target UE in activated state have been completed (see Fig. 3A).

Regarding claim 4, Evensen discloses A method according to claim 1, wherein the said performing a privacy check for a location request in step A comprising: for the location request, the LCS system performing a privacy check based on the updated privacy profile of the target UE, comparing the saved information of the location request with the current privacy profile of the target UE, deciding whether the saved information of the location request satisfies the condition of the current target UE's privacy profile to allow the location information of the target UE to be provided to the LCS client, if the condition is satisfied, the location request will pass the privacy check; otherwise, the location

Art Unit: 2617

request will not pass the privacy check(see page 3, [0024]).

Regarding claim 8, Evensen discloses A method according to claim 1, wherein the procedure of the location service system is aware that the privacy profile of the target UE was updated comprising: A0. the Privacy Profile Register (PPR) sending to the GMLC of the LCS system an LCS Privacy Profile Update Notification(see Fig. 3B).

Regarding claim 9, Evensen discloses A method according to claim 8, wherein, after the Step A0, the method further comprising: GMLC returning to PPR an LCS Privacy Profile Update Notification ACK(see Fig. 3B).

Regarding claims 10 and 11, Evensen discloses a method according to claims 1 and 6, respectively, wherein, after the Step C, the method further comprising: the LCS system sending to the LCS client corresponding to the said location request an inherent notification of canceling the location request (reads on not accepting location request)(see page 2 [0016]).

Allowable Subject Matter

5. Claim5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
